Subject: Microsoft settlement a disgrace!

I wholeheartedly support the notion that the proposed Microsoft settlement is just another attempt by Microsoft to further encroach on the alternative operating systems available to the public.... most notably that of Apple's current position in education. If you want to punish Microsoft for their attempts at domination, make them anty up cash payments.... not just approving their dumping refurbished windows systems on the educational systems which just makes those same school systems even more dependent on Microsoft.. YOUR PROPOSAL DOES NOTHING MORE THAN AID THEIR ATTEMPT TO DOMINATE THROUGH A MONOPOLY!
